

DATA SHEET

Our combination Beader and Crimper is a light weight machine and can perform both beading and crimping sequentially in one setup. This hand cranked unit is portable and intended for field use in the insulation trade where thin gauge materials are required.

Features

- Designed and manufactured in the USA.
- Performs both beading and crimping operations sequentially with one setup.
- No tools are needed for setups.
- All adjustment knobs are captive.
- Both bead and crimp have markable surfaces to assist the user in repeating setups.
- Supplied with 1/4" bead. 1/8" bead is also available
- The unit allows the head to be positioned as desired to the preference of the operator.
- Easily portable for job site usage
