

SPECIFICATIONS

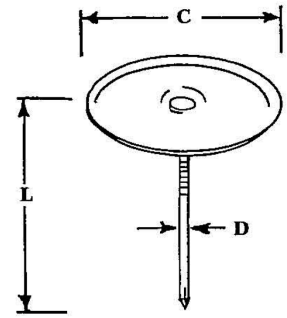

The Quilting Pin is a stainless steel cupped head pin, which is a fabricated part made up of a weld pin and a staked-on speed clip, or retaining washer.

Quilting pins are primarily used for thermal insulation products and removable reusable thermal insulation blankets. They hold the insulation inside the blanket in place to prevent it from settling down. This helps in maintaining a continuous envelope of thermal protection.

Common lengths of 1", 1½", 2½" and 4½".

Specifications			
Material	"C"	"D"	"L"
Pin: 304 Stainless Steel (Annealed)	1 3/16"	14 GA. (.080)	3/8" to 12"
Top: 304 Stainless Steel		12 GA. (.105)
